

Formula: C₆H₁₃N

Molecular weight: 99.17

CAS NO.: 108-91-8 **EINECS** 203-629-0

Specification:

Items	Index		
Appearance	Colorless to light yellow liquid		
Assay	99.5%	99.3%	99.0%
Color	20	20	20
Water	0.1%	0.1%	0.2%
Relative Density	0.8647(25/25°C)		
BP	134.5°C		
Flash Point (open)	1.4585		
Melting Point:	-17~-18°C		
Refractive Index	1.4585		

Properties:

Cyclohexylamine is colorless to pale yellow clear liquid, no visible impurities. It has a strange odor. It is a strong organic caustic liquid, it can form an azeotrope with water at 96.40°C, miscible with a lot of organic solvents.

Usage:

Raw material for producing desulfurization agent, boiler corrosion inhibitors, boiler water treatment, vulcanization accelerator, emulsifier, antistatic agent, latex coagulant, oil product additives, corrosion resistance agents, fungicides, pesticides and so on.

Package and Storage:

175-190kgs/drums, stored on shelves in dry and ventilated storehouse.
