

KURITA F-4950

Slime control agent for Open & Closed Recirculating Water System

Description

KURITA F-4950 is a slime control agent showing excellent biocidal effect in open and closed recirculating cooling water systems.

Features

- Excellent control effect on algae, bacteria and fungi at low dosage.
- Effective slime removing and dispersing effect
- Non-oxidizing and non-halogenous compound type.
- Non-corrosive to steel and copper materials.
- Liquid type for easy handling

Application

1. Dose **KURITA F-4950** into cooling tower basin for shock treatment.
2. Maintain **KURITA F-4950** dosage at 100 - 400 mg/l (ppm) against the system holding water volume on a regular (weekly or fortnightly or monthly) basis or as and when required.

Properties

Main Ingredient : Nitrogenous compounds and organic polymer
 pH (20°C) : 11.9 ~ 12.9
 Appearance : Light yellow to yellowish or greenish brown liquid
 Specific Gravity : 1.04 - 1.08

Handling and Storage

- Avoid contact with eyes and skin. Wear protective face shield and rubber gloves.
- In case of contact, flush affected area with plenty of water thoroughly. Seek medical attention if affected area irritation persists.
- Store **KURITA F-4950** indoor from freezing and extreme heat.
- Do not use empty container for drinking water supply.
- Refer to product's Safety Data Sheet for more information.

Packaging

Standard drum
